

Biology

Chapter 15/16 Vocabulary

Insects

exoskeleton

endoskeleton

chitin

cephalothorax

open circulatory system

ventral nervous system

antenna

compound eyes

simple eyes

classification of arthropods

-
-
-
-
-

malacostraca

green glands

antennules

statocyst

arachnida

five characteristics of arachnids

-
-
-
-

-

book lungs

characteristics of insects

-
-
-
-

types of wings

-
-
-

salivary glands

gastric sece

spiracles

malpighian tubules

tympanum

ovipositor

metamorphosis

types of metamorphosis

1.

Stages:

2.

Stages:

Fish

class Osteichthyes

air bladder

scales

mucus

chromatophores

countershading

operculum

atrium

ventricle

olfactory sacs

lateral line

spawn

milt

yolk
